For immediate release.

Ashlar-Vellum™ Announces Cobalt™, Xenon™ & Argon™ v11

September 24, 2018, Austin, TX. Ashlar-Vellum announces the development and upcoming release of Cobalt, Xenon and Argon version 12, their 3D solid and surface modeling products on Mac and Windows.

All three of the products have the following enhancements in version 11:

- Up to 25% faster on zooms, pans and selects, the things users do most.
- Further improvements to DXF/DWG imports/exports.
- Miscellaneous bug fixes and enhancements.
- Support for the most current operating systems for Mac & Windows.

Final release is anticipated after the first of the year. With a manufacturer's suggest retail price for US \$145 for the upgrade from v10 to v11, Ashlar-Vellum is offering pre-release discounts. Upgrades from Cobalt, Xenon or Argon v8 and v9 are also available. See our website for details. Those purchasing during pre-release are eligible for both v10 and v11.

Robert Bou, Ashlar-Vellum's president, commented, "Greater speed, especially on large models and drawings, and a smoother workflow mean that those who really need to get their work done will be thrilled with this upgrade and find it well worth the investment to upgrade."

About Ashlar-Vellum

Founded in 1988, Ashlar-Vellum is the leading provider of precision CAD and 3D modeling software that automates and simplifies the design process for drafting, design, and engineering professionals on both Macintosh and Windows platforms. Ashlar-Vellum's unique Organic Workflow™ featuring their renowned Vellum® user interface and powerful toolsets have earned the loyalty of innovators around the world. Ashlar-Vellum operates from its headquarters in Austin, Texas. To learn more call +1 800-877-2745 or visit www.ashlar.com.
